

Version 2.3.6.RELEASE

Table of Contents

1. New in Spring Data Redis 2.3.	2
2. Spring Data Redis 2.2	3
3. Spring Data Redis 2.1	4
4. New in Spring Data Redis 2.0	5
5. New in Spring Data Redis 1.8.	6
6. New in Spring Data Redis 1.7	7
7. New in Spring Data Redis 1.6.	8
8. New in Spring Data Redis 1.5.	9

Chapter 1. New in Spring Data Redis 2.3

- Template API DDDD Duration D Instant.
- Stream Commands $\square \square$.

Chapter 2. Spring Data Redis 2.2

- [redis.streams]
- DDDD keys DDD union/diff/intersect DDDD
- 🕮 Jedis 3.
- $\square\square\square\square\square$ Jedis Cluster $\square\square\square\square\square\square\square\square$.

Chapter 3. Spring Data Redis 2.1

- 🛮 Lettuce 🗘 Unix domain socket 🕮
- Lettuce [][],[][]
- 0000
- @TypeAlias DD Redis DDD.
- Cluster-wide SCAN using Lettuce and SCAN execution on a selected node supported by both drivers.
- Reactive Pub/Sub to send and receive a message stream.
- BITFIELD, BITPOS, and OBJECT command support.
- Align return types of BoundZSetOperations with ZSetOperations.
- Reactive SCAN, HSCAN, SSCAN, and ZSCAN support.
- Usage of IsTrue and IsFalse keywords in repository query methods.

Chapter 4. New in Spring Data Redis 2.0

- Upgrade to Java 8.
- Upgrade to Lettuce 5.0.
- Removed support for SRP and JRedis drivers.
- Reactive connection support using Lettuce.
- Introduce Redis feature-specific interfaces for RedisConnection.
- Improved RedisConnectionFactory configuration with JedisClientConfiguration and LettuceClientConfiguration.
- Revised RedisCache implementation.
- Add SPOP with count command for Redis 3.2.

Chapter 5. New in Spring Data Redis 1.8

- Upgrade to Jedis 2.9.
- Upgrade to Lettuce 4.2 (Note: Lettuce 4.2 requires Java 8).
- Support for Redis GEO commands.
- Support for Geospatial Indexes using Spring Data Repository abstractions (see [redis.repositories.indexes.geospatial]).
- MappingRedisConverter-based HashMapper implementation (see [redis.hashmappers.root]).
- Support for PartialUpdate in repositories (see [redis.repositories.partial-updates]).
- SSL support for connections to Redis cluster.
- Support for client name through ConnectionFactory when using Jedis.

Chapter 6. New in Spring Data Redis 1.7

- Support for RedisCluster.
- Support for Spring Data Repository abstractions (see [redis.repositories]).

Chapter 7. New in Spring Data Redis 1.6

- The Lettuce Redis driver switched from wg/lettuce to mp911de/lettuce.
- Support for ZRANGEBYLEX.
- Enhanced range operations for ZSET, including +inf / -inf.
- Performance improvements in RedisCache, now releasing connections earlier.
- Generic Jackson2 RedisSerializer making use of Jackson's polymorphic deserialization.

Chapter 8. New in Spring Data Redis 1.5

- Add support for Redis HyperLogLog commands: PFADD, PFCOUNT, and PFMERGE.
- Configurable JavaType lookup for Jackson-based RedisSerializers.
- PropertySource-based configuration for connecting to Redis Sentinel (see: [redis:sentinel]).
